Title of Submission:	Model of policing
Comments:	After review of policing in Ireland best practices from around Europe should be looked at in particular the Dutch model of policing which occurred due to over haul of policing in the Netherlands in the 90s and development of 4 main tenants of policing the visibility of police on the street in the Netherlands has had hudge impact on crime rates and trust in the police it is very important that also complete overhaul at top occurs and a commissioner be employed from an external police force occur with no Government connection the force needs to be separate independent entity that monitored and audited by an independent state or non state body
