Title of Submission:	Balanced Policing
Comments:	<p>Whereas I believe our Police do a fair job at policing, I would agree that resources are in the main responsible for a very serious lack of people confidence when it is for certain that criminals do not receive efficient or consistent punishment for their crimes committed, the system needs reform at the upper level, we do not have enough prison spaces, our Judges are unable or unwilling to met out the time for the crime because of the lack of these spaces, our police officers are beaten by this system, they fulfil their duty in apprehending and bringing them before the courts, only for the criminal to walk free as member public sees it, when you flip the coin, and include or take account of the Motorist law breaker, the resources are there to deal with all aspects of all offences committed, we should question how or why, the money generated by these offences is the answer and the solution, and a very positive one at that, it is said in Ireland, should you have money you get Justice, if not you get the law, hence I believe that a crime is a crime, you break the law you receive the punishment, this is true of the Motorist, why not ringfence some or all of the police issued fines on Motorist into the Department of Justice in allowing the prisons and courts avail of much needed funding, this is my submission.</p>
